“Equipping The World For A Better Environment”

Features

J.V. Manufacturing, Inc. has offered a complete line of Cram-A-Lot® trash compactors for your waste disposal needs since 1984. We offer compactors of various sizes, from small apartment compactors to 15 cubic yard capacity transfer compactors.

All designed to safely, quietly and efficiently compact your trash.

*For non-standard units please refer to our specialty compactors brochure.

Standard Features

- ANSI Z245.2 Compliant All compactors meet or exceed ANSI Z245.2 safety standards.
- Integral Power Unit Integral to the compactor chassis for security, yet accessible for ease of maintenance and repair.
- UHMW Ram Guides Adjustable to assure straight tracking and readily replaceable, should the need arise.
- Oil Sight Gauge Oil level at a glance.
- Oil Filter Replaceable spin-on cartridge to keep your oil clean.
- Heavy duty controls NEMA 4 rated pushbutton controls with key-lockable start switch.
- Single cycle operation.

Commercial Size 2-4 Yard Compactors

Commercial size (4 cubic yard nominal size and smaller) Cram-A-Lot® compactors are designed for moderate duty service. They are perfect for retail stores, light industrial plants, grocery stores, hospitals and many more similar applications.

The 4-yard compactor is designed for heavy commercial, industrial and mini-transfer stations. Engineered to handle above average quantities of refuse when transfer station is not applicable.

Most units totally UL listed.

Heavy Industrial 5-15 Yard Compactors

Large Industrial (5 cubic yard nominal size and larger) Cram-A-Lot® compactors are designed for heavy industrial duty service. They are perfect for manufacturing facilities, heavy industrial plants, transfer stations and many more similar applications.

Additional features include:

- Power Unit, Innovative hydraulic circuit design is used universally in Large Compactors, Horizontal Balers, and Pre-Crusher Compactors.
- Reduced Components, hoses and fittings.
- UL listed control panel.
- More efficient, cooler operating, hydraulic system.
- Shorter lead time.
- Increased performance.

All information is subject to engineering and/or other changes without notice.

Leasing and Rental Programs Available

Special Options Available

Remote Controls

Color Coded Pressure Gauge

Hinged Breaker Bar Teeth

Remote Controls

All compactors, come with on/off switch as mandated by ANSI Z 245.2 safety standards. Cram-A-lot offers additional options for increased levels of safety.

Color Coded Pressure Gauge

The color coded gauge indicates 50%, 75% and 100% fullness. The gauge is more accurate than fullness lights.

Oil Heater

Ideal for cold climate areas. The oil heater automatically maintains the oil at 70 degrees.

Hinged Breaker Bar Teeth

Hinged breaker bar teeth hold trash in place, preventing trash from springing back into the chamber.

Ozone Odor Neutralizer

Odor neutralizers like the Sonozaire circulate the ozone, permitting it to search out and destroy odor molecules. The result is a clean-smelling area, which does not harbor and protect bacteria ending odor complaints and assuring customer satisfaction.
